>> Advantages

- ✓ The yarn used in the seams are in contrasting colours, making it easier to control the harness.
- ✓ The D-rings used in our harnesses have a high breaking strength with no visible welding marks.
- ✓ The webbing used in manufacturing **SINGER® Safety** harnesses is made of dope dyed high tenacity polyester yarn which has 6 times higher resistance to UV colour degradation over the normal dyed webbing. This procedure provides a unique resistance against UV degradation, 6 times superior than straps classically tinged. This method provides a greater longevity of the final product.
- ✓ Wide back pad for better comfort and productivity, with leg straps. The straps on legs, on shoulders and on belt are adjustable. Particularly suitable for hard environments.

>> Conformity

This product has been tested according to the following European standards:

- **EN 361: 2002.** Personal Protective Equipment against falls from a height. Full body harnesses.
- **EN 358: 1999.** Personal protective equipment for work positioning and prevention of falls from a height. Belts and lanyards for work positioning or restraint
- **EN 813: 2008.** Personal Protective Equipment against falls from a height. Sit harnesses.

It complies with European **Regulation (EU) 2016/425** on Personal Protective Equipment (PPE). **Category III.**
 EU type examination certificate (**module B**) issued by **SATRA (Ireland)**. Notified body **n°2777**.
 The PPE is subject to the conformity assessment procedure based on quality assurance of the production process (**Module D**) set out in Annex VIII (Category III) under surveillance of **SGS Fimko Oy (Finland)**. Notified body **n°0598**.
