>> Main advantages

- ✓ Cotton lining: softness and comfort of a natural fiber more pleasant to wear especially during summer time. (better air permeability, better moisture absorption and better perspiration performance)
- ✓ Segmented bands that improve air permeability (breathability) and elasticity of the garment (more comfortable).
- ✓ Very light to wear. Soft, functional and comfortable knitting.
- ✓ Modern and innovative cut.
- ✓ Reinforced sweat tape at collar.
- ✓ Hemmed sleeves and bottom.

>> Compliance

	Result ▼
Background & Retro-reflective material	Class 2

Information about classes
 Class 3: highest level of visibility. Class 2: intermediate visibility level.
 Class 1: lowest level of visibility.

Minimum area requirement in m ²	Class 3 garment	Class 2 garment	Class 1 garment
Background material	0.80	0.50	0.14
Retro-reflective material	0.20	0.13	0.10
Combined performance material			0.20

Background fluorescent coloured material, for the day
 Fluorescence is the ability of a material to reflect more light than it receives.
 Consequently fluorescent colors seem more vivid than those which does not have this property.

Retro-reflective material for night
 A retro-reflector is a device capable of reflecting the light it receives back in directions close to the source. Thus the driver who light a pedestrian in the night with the headlights of his vehicle, can identifies very quickly the garment which features a retro-reflective material.

The coefficient of retro-reflection of the retro-reflective material must be class 2 to comply with EN ISO 20471 (class 1 of previous EN 471 standard has been cancelled).

(x) the figure next to the pictogram indicates the category of the garment according to the minimum area requirement in m².
