>> Main advantages

- ✓ Numerous and convenient pockets. Comfortable knitted wind cuffs under the sleeves.
- ✓ Lightweight while providing essential security particularly at night thanks to its retro-reflective material.
- ✓ Warm polar fleece lining. Straight collar and «storm» hood for a good protection of the neck.
- ✓ Special fabric with wate barrier membrane in, makes it breathable and water resistant.
- ✓ Dark blue colour at garment bottoms to prevent soiling of the high-visibility material.
- ✓ Convenient 2-in-1 system offers wearer options to use as a jacket (with sleeves) or a vest (without sleeves)
- ✓ Small retro-reflective tapes above the shoulders for good visibility even above the wearer (good visibility for example from crane operators on construction sites!).

	Result ▼	Result ▼
Background & Retro-reflective material	Class 2	Class 1

**Information about classes**  
 Class 3: highest level of visibility. Class 2: intermediate visibility level.  
 Class 1: lowest level of visibility.

Minimum area requirement in m <sup>2</sup>	Class 3 garment	Class 2 garment	Class 1 garment
Background material	0.80	0.50	0.14
Retro-reflective material	0.20	0.13	0.10
Combined performance material			0.20

**Background fluorescent coloured material, for the day**  
 Fluorescence is the ability of a material to reflect more light than it receives. Consequently fluorescent colors seem more vivid than those which does not have this property.

**Retro-reflective material for night**  
 A retro-reflector is a device capable of reflecting the light it receives back in directions close to the source. Thus the driver who light a pedestrian in the night with the headlights of his vehicle, can identifies very quickly the garment which features a retro-reflective material.

The coefficient of retro-reflection of the retro-reflective material must be class 2 to comply with EN ISO20471 (class 1 of previous EN471 standard has been cancelled).

(x) the figure next to the pictogram indicates the category of the garment according to the minimum area requirement in m<sup>2</sup>.
